Perfect solution for better grip, stability and reduced tire wear

With main goal to find suitable »cover for every tire«, Veriga is constantly developing new products and improving existing, all in terms of user friendliness and care for the environment.

It was established in 1922. Today, 100 years later, Veriga has four different lines of products (forest, snow, tpc and sport), own metal plating and heat treatment facility, testing laboratory, and is exporting to over 60 countries all over the world.

If you need custom made product, Veriga is perfect partner for that. Focusing on a smaller serial products can always provide a comprehensive and quality solution.

*#madeineurope #qualitychains #trustedpartner*

**VERIGA***snow*

6

Our snow tyre chains are the accessories that provide you with even more traction and a safer ride on snowy and icy terrain. We are one of the world's leading manufacturers of snow chains, boasting a long tradition, quality workmanship and long product life.

**VERIGA***forest*

36

VERIGAforest programme is classified into the GreenTRACK line, represented by tracks for mobile machinery, a line of tyre chains for tractors and similar machinery, and a line of choker chains and similar logging supplies, designed for harvesting wood. All products from the VERIGAforest programme are distinguished by high-quality craftsmanship and treatment, providing a long service life.

**VERIGA***tpc*

48

VERIGAtpc is a programme of protective tyre chains intended for heavy working machines in mines, quarries and landfills. Tyre protection, improved grip and improved machine stability are just some of the benefits of using our tpc chains.

**VERIGA***sport*

52

The sport programme is a carefully thought-out additional range developed under the watchful eye of our professional associates. We were the first to introduce leisure crampons to the world and since then, due to customer needs, different products have been developed.
